Toy Theater

TOY THEATER
LEARN • CREATE • PLAY

Toy Theater is a website with virtual manipulatives, classroom tools, and games. The website can be used by both teachers and students in the classroom or at home.
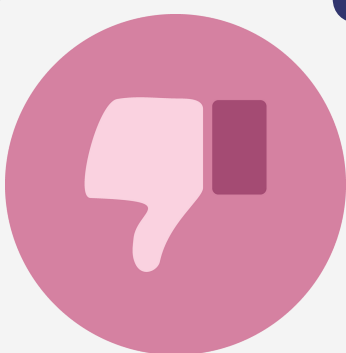

PROS:

- Classroom management tools!
- Virtual manipulatives for math, english, art, and other subjects are available!
- Students can access this resource at home with their parents!
- Free printable worksheets are available off of a partner website called "Class Playground"

CONS:

- This is an American website. Some components of the site are not suitable for Canadian education.
- Technology is needed.
- If you do not want ads, or want to add students to your profile in order for them to be on their own device, you have to pay for the resource.
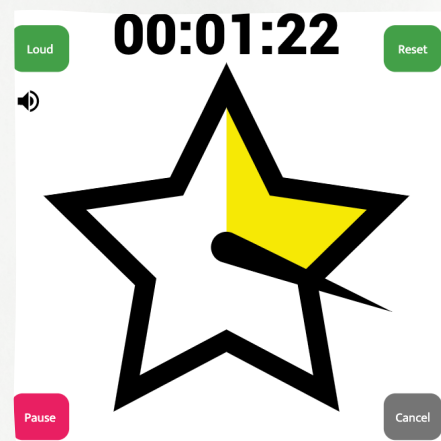

Tool #1

Spinner

A great tool for quickly dividing students into groups!
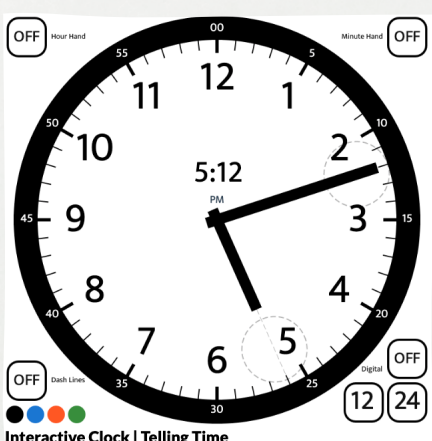

Tool #2

00:01:22

Classroom Timer

Useful to divide the day into small chunks for discussion/ reading/ classwork/breaks. You can customize the time, shape and colour!

RISKS

- Children could just play games, rather than complete the assignment/tool.
- Ads pop up on the free version so students will likely see them, unless you pay for the teacher version.
- Children could be discouraged to learn, and don't want to complete their work without Toy Theater
- Due to being a website, can affect health if too much time is spent on the screen
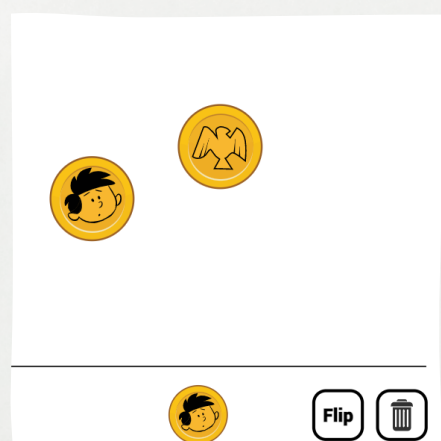

Tool #3

5:12
Interactive Clock | Telling Time

Interactive Clock

This helps students practice their time telling abilities. It also helps orient them with their daily schedules.

Tool #4

Coin Flip

A fun, interactive way to make a split decision. Would create energy for an otherwise lesser of two evils choice.
